

# BRMS Consolidated Billing Services

BRMS is focused exclusively on providing easy-to-use, fully compliant services to employers of all sizes.

## Consolidated Billing

The Consolidated Billing module of Vbas combines billing from all your carriers into one bill, automating the process and ensuring accuracy of data.

Vbas allows you to view and make adjustments, credits and retro payments, per carrier. The majority of carrier's provide a discrepancy report after each file is processed. Each discrepancy report is reviewed and reconciled within 2 business days. We currently EDI with all Multiple Choice carriers, such as Blue Cross/Blue Shield, Health Net and Kaiser Permanente, and Vbas has interfaced with over 100 carriers to date.

In addition to the single invoice generated by Vbas, BRMS' expert accounting staff can manage all of your premium billing for you, including identifying retroactive charges and credits, conducting reconciliation and submitting payment on your behalf.

BRMS will receive and reconcile all of your carriers' invoices. In turn, we issue you one itemized invoice to pay per month. All you do is check one invoice and write one check. It's that simple. We even handle the payment for you.

## Includes:

- Eligibility Verification
- Rate Changes
- Carrier Discrepancies
- Credits/ Retroactive Charges
- Reconciliation
- Single itemized invoice to clients
- Payment to Carriers
